Education

Sri University **July 2020 – May 2024**

Bachelor of Technology in Computer Science *Tirupati, Andhra Pradesh*

Relevant Coursework

- Data Structures
- Database Management
- Software Engineering
- Operating Systems
- Cloud Computing
- Machine Learning
- Artificial Intelligence
- Compiler Design

Experience

slash Mark **Dec 2024 – April 2024**

Java Intern *Virtual*

- Gained hands-on experience with Java through guided learning sessions, focusing on building foundational programming skills by completing basic to intermediate-level projects.
- Developed a Web Medical Management System and an Employee Management Application, applying object-oriented principles and improving problem-solving techniques.
- Strengthened understanding of core Java concepts such as data structures, multithreading, and object-oriented programming, while gaining practical experience in automating tasks with simple scripts and enhancing code quality through debugging techniques.

Projects

AI Resume Analyser | *Python*

- Developed an AI-powered tool to analyze and evaluate resumes based on job descriptions, providing feedback on skills, formatting, and overall effectiveness.
- Implemented natural language processing techniques to extract relevant information from resumes and match them with job requirements.
- Created a user-friendly interface for users to upload resumes and receive detailed reports with actionable insights.

Web Medical Management System | *Java*

- Created a web-based medical management system that enables patients to schedule online appointments and manage medical records.
- Implemented modules for doctors to provide services and connect with potential organ and blood donors.

Certifications

Data Analytics with Python | *NPTEL*

- Completed a course focusing on the fundamentals of data analytics using Python, covering data manipulation, visualization, and basic statistical analysis techniques.

Cloud Computing | *NPTEL*

- Acquired foundational knowledge in cloud computing concepts, services, and deployment models, including cloud storage, virtualization, and security measures.

Responsive Web Design | *freeCodeCamp*

- Completed a certification in creating responsive and accessible web designs using HTML and CSS, with a focus on building mobile-friendly websites and implementing design best practices.

Skills

Languages: Python, Java, SQL, HTML, CSS, JavaScript
Concepts: Object-Oriented Programming, Database Management, Web Development
Soft Skills: Problem Solving, Communication, Teamwork, Critical Thinking

Extracurricular Activities

- Competed in basketball at the South Zone university level, showcasing teamwork and competitive spirit.
- Successfully completed 3 years of NCC training, demonstrating discipline and commitment.
